DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to claims 1, 11, 12, and 13, the prior art failed to teach or render obvious the flow meter having a pair of beams and a pair of collecting optical systems positioned at opposite ends of the path adjacent to the means for directing the pair of beams for collecting deflected wave energy from the pair of beams; the compensation module configured to estimate a total intensity of wave energy received by the means for receiving the pair of diffused beams and to generate a compensation signal representative of said total intensity of wave energy received, and coupled to provide said compensation signal to said driver, whereby the driver controls the wave energy source to vary an initial intensity of the pair of beams in response to the compensation signal such that the total intensity of wave energy received remains constant; all in the context of the claims. The prior art teach various optical flow measuring devices including interferometers. However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
